1.0	LANDSCAPE WORKS					
1.a	Pruning and trimming Pruning and trimming of shrubs is aimed at regulating the height, shape and thickness of growth. Pruning shall involve the removal of dead, diseased, damaged branches, removal of shoots alien to the character of the plant, removal of old or weak growth, removal of dead or damaged shoots. Groundcovers shall be trimmed regularly to keep growth low, i.e. horizontal and within its bounds. All pruning cuts shall be made cleanly, leaving no ragged edges, torn barks, or bruising and crushing of the stems.					
1.b	Weeding and Forking. Weeding shall mean the removal of unwanted growth such as weeds, lallang, etc. Soil around the base of trees, shrubs and groundcovers to be kept clear of weeds and grass by hand weeding or hoeing. All weeded areas shall be regularly forked to ensure better soil aeration and reduce compaction but care must be taken not to damage the roots of plants.					
1.c	Replacement of Trees / Shrubs / Other Plants. Contractor must straighten trees and replace dead or dying trees or other plants under his care whenever directed by the S.O. Dead or dying plants due to negligence shall be replaced at Contractor's own expense. Keeping compound and drains clean.					
1.d	Maintenance of Trees, Shrubs and Groundcovers. Maintenance means watering, replacement of dead or dying trees, shrubs, and / or groundcovers, replacement of tree guards or stakes and / or ties, fertilizing, pest control, proper pruning, trimming, edging, weeding and clearing of unwanted growth such as weeds, lallang etc. around the base of each tree and shrub or within or around a planting bed.					
1.e	Watering. All plants shall be watered as required to maintain satisfactory growth. Only clean water from the water used in carrying out the works. No source of supply other than the public water mains may be used without it first being inspected and approved by the S.O. Watering shall be carried out using a hose with spraying nozzle or a proper watering can.
